## Alliance Partner Profile - Xosoft

### XOsoft Overview

Founded in 1999, XOsoft is a leading provider of continuous application and information availability solutions that fully address business continuity, disaster recovery, continuous data protection and content distribution needs. XOsoft products ensure uninterrupted access to all types of file and application servers, including Microsoft Exchange, Microsoft SQL and Oracle Database, and allow instantaneous recovery from any type of disaster.

XOsoft has been providing application availability software to global corporations and has thousands of successful implementations world-wide. XOsoft's portfolio consists of the following solutions:

- ◆ [Disaster Recovery](#) software for file servers, Exchange, SQL and Oracle
- ◆ [High availability software](#) with automated failover and automated failback for file servers, Exchange, SQL and Oracle
- ◆ [Disaster recovery testing](#) — our newest product that performs fully automated scheduled tests that validate the replica data without disrupting an IT environment
- ◆ [Continuous data protection](#) (CDP) embedded technology that provides instant data recovery in the event of isolated data corruption episodes
- ◆ [Content distribution](#) for Site Server replacement needs as well as data consolidation capabilities

Customer ROI is achieved in 30-45 days or less, however, should downtime occur due to any unforeseen outage, within mere minutes our solution not only pays for itself, it provides value well beyond the initial investment.

For more information please see [www.XOsoft.com](http://www.XOsoft.com).

### Partnership Overview

Neovera partners closely with XOsoft in deploying "value driven" Backup and Recovery solutions (with a special emphasis on delivering full end-to-end DR solutions to the SMB market). For clients looking for more than the typical tape backup DR solution, Neovera and XOsoft make an ideal choice.

How our partnership model works is simple! Neovera hosts the client's DR servers in our hardened data center and uses XOsoft's WANSync HA product suite to replicate the data to our secure facilities real-time.

Jointly, Neovera and XOsoft provide a comprehensive High Availability solution allowing customers to get back on-line in case of a primary site failure in a matter of minutes/hours vs. days/weeks.

### About NEOVERA

Neovera is an IT professional services company providing strategic infrastructure consulting and outsourced managed hosting services.

We distinguish ourselves from other IT services firms by providing a combination of senior level application experts with world-class infrastructure engineers.

With Neovera our clients receive industry experts at a great value. This coupled with a high degree of personal attention, flexibility and smaller company commitment makes Neovera a unique alternative to traditional IT Services firms.

Neovera is headquartered in Reston Virginia. For more information on Neovera please see [www.neovera.com](http://www.neovera.com).
