

NeoCyber™ UTM Services

Today's businesses need more than a network firewall. In order to thwart advanced and persistent threats, a consolidated protection of intrusion prevention, antivirus, and application control must be used. UTM technology delivers comprehensive protection and simplifies security management, all without slowing your network.

Experience a new level of security effectiveness and performance, designed for small to medium sized businesses. Neovera provides dedicated 24x7 Unified Threat Management (UTM) management and/or monitoring services to ensure the security of your organization's network.

Our NeoCyber UTM Services offering provides enterprise grade security to customers that may not have the resources of a full IT staff, delivering in-depth defenses against advanced malware, ransomware, botnets, trojans, viruses, drive-by downloads, data loss, phishing and much more. Whether you need management or monitoring of your UTM appliance(s), we've got you covered. Bottom line: We protect your data from cyber attacks.

FEATURES & OPTIONS

24x7 Continuous Security Monitoring from our state-of-the-art Joint Security Operations Center (JSOC) providing the extra layer of protection between you and the security threats that can damage your business.

Advanced Persistent Threat (APT) Protection uses a cloud-based sandbox with full system emulation to detect and block advanced malware and zero day attacks.

Intrusion Prevention Service (IPS) delivers in-line protection from malicious exploits, including buffer overflows, SQL injections, and cross-site scripting attacks.

Web URL Filtering controls access to sites that host objectionable material or pose security risks.

Gateway AntiVirus scans traffic on all major protocols to stop threats.

Detailed Security and Compliance Reports for regulations including PCI DSS, HIPAA, NERC, GLBA, ISO, and more

Application Control keeps unproductive, inappropriate, and dangerous applications off-limits.

Spam Blocking delivers continuous protection from unwanted and dangerous email.

Reputation Enabled Defense ensures faster, safer web surfing with cloud-based reputation look-up.

Data Loss Prevention (DLP) automatically inspects data in motion for corporate policy violations, and includes built-in PCI and HIPAA compliance scanner.

Starting at only \$2,000/month
