# SECURELY ENABLING YOUR JOURNEY TO THE CLOUD

Neovera's managed IAM service demystifies IAM cloud migration and helps organizations adopt cloud applications with confidence by managing your current IAM solution on premise, in the cloud, or a hybrid approach. That way enterprises can move at their own pace of migration and risk tolerance vs. being forced into highly risky cloud deployments.

Neovera can help organizations with providing user provisioning, single sign-on (SSO) and identity life-cycle management as a service, at a low TCO and fast time to value. Bring control and visibility into an organization's cloud environment, simplify account reconciliation, and reduce the cloud attack surface. A unified approach delivers SSO across cloud and on-premises applications, simplifies the end-user experience and helps boost productivity.

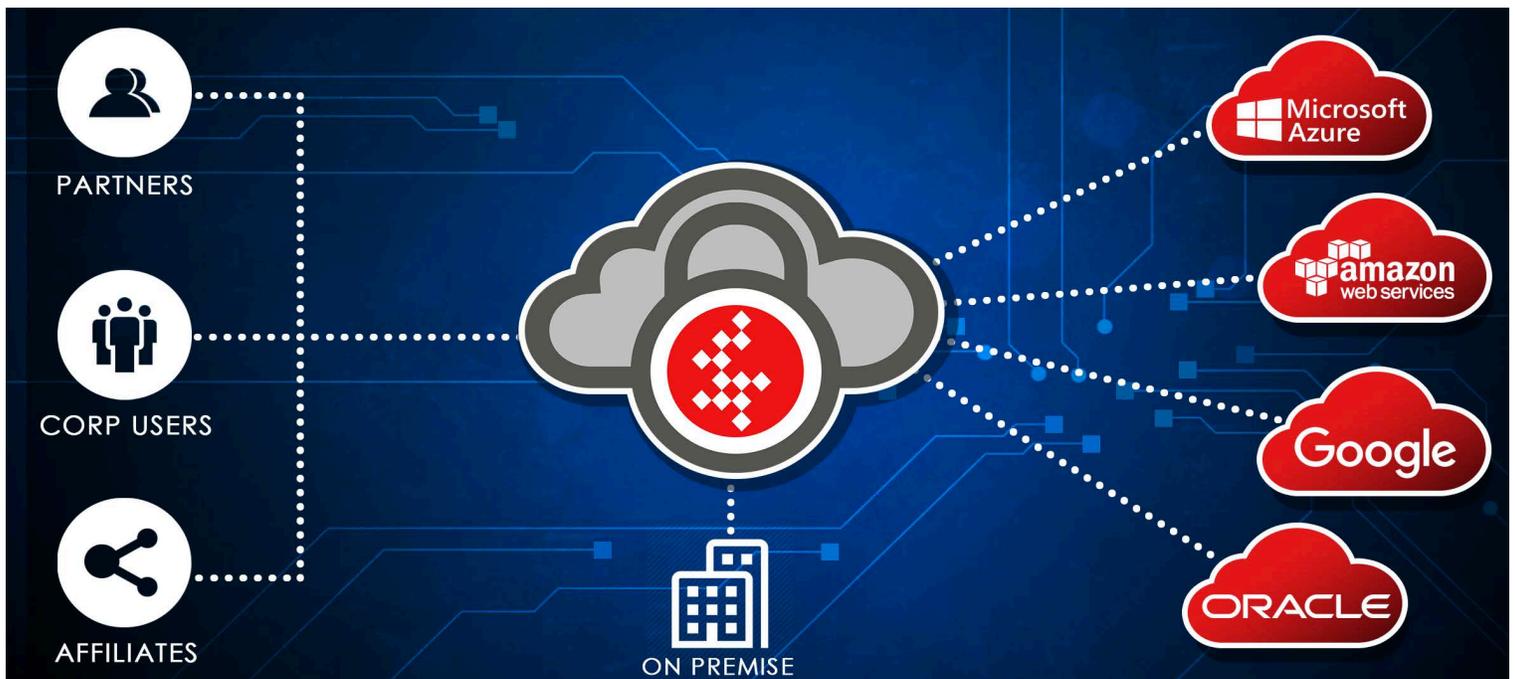

- **User provisioning:** Provisioning rules automate the creation and management of user accounts and entitlements within SaaS applications.
- **Single sign-on:** A unified application launchpad and integration with SSO enables seamless access across cloud and on-premises applications.
- **Account discovery and management:** Bidirectional integrations discover accounts on target applications, simplify reconciliation and enable remediation of orphan accounts.
- **Multi-factor authentication:** Supplement user name and password login into SSO with a second factor such as a one-time password via SMS or email, or a mobile phone application.
- **Application management:** On-board cloud applications to enable user provisioning and SSO, while gaining visibility into application accounts and activity.

## KEY BENEFITS/RESULTS

- **Minimizes the cloud attack surface** with accurate, dynamic and bidirectional user provisioning
- **Improves business agility** with fast and secure rollout of cloud applications
- **Boosts employee productivity** with secure SSO for hybrid environments
- **Reduces administrative costs** with easy and automated identity and entitlement management

## KEY DIFFERENTIATORS

- **AROUND THE CLOCK JSOC:** 24x7x365 1AM Management and Operators
- **FULLY MANAGED:** Day-to-day operations
- **UPGRADES:** One upgrade per year

# THREE SIMPLE STEPS TO GET STARTED

**1**

## IAM CLOUD WORKSHOP

Customized to your needs, this interactive session is a unique opportunity for business and security leaders to understand their exposure and make informed decisions about identity and access management.

- How to control cloud identity sprawl
- Gain visibility into identities and cloud application usage
- How to automate user provisioning across your hybrid enterprise

**2**

## IAM CLOUD READINESS ASSESSMENT

We help you understand how to accelerate secure cloud adoption from your enterprise to the cloud and back.

What applications are ready to move to the cloud? Do my Identity management processes need to change? How do I manage my privileged users for both cloud and non-cloud applications? How do I lower my identity costs while providing more functionality?

**3**

## IAM MANAGED SERVICE

Neovera's managed IAM service demystifies IAM cloud migration and helps organizations adopt cloud applications with confidence by managing your current IAM solution on premise, in the cloud, or a hybrid approach.

Neovera can help organizations with providing:
- User provisioning,
- Single sign-on (SSO)
- Identity life-cycle management as a service, at a low TCO and fast time to value.
